COLOUR PALETTE

There are 2 colours within the Secretcare.in logo (excluding white/paper). The Pantone or SPOT colour values listed below can be passed on to printers, painters, sign writers, etc. The CMYK values can also be passed on to printers and graphic designers. The HEX values are web colour values. It is crucial that these values are consistently applied to maintain the integrity of the ImageRedefine brand identity

Pantone 235 C

TYPOGRAPHY

The primary Secretcare.in typeface is called Jenna Sue and should be the only font used on printed collateral. Use Lato typeface for the print and website bodytext. Arial can be used as a replacement font for online purposes (i.e. webpage and email signatures) and Calibri for internal designs (i.e.Word and PowerPoint docs).

USING OUR LOGO

Again, it is crucial that the logo is reproduced in its correct form/colours in order to uphold the integrity of the brand. Notice how the internal elements within the logo fit neatly inside a rectangle. These proportions must remain the same

- DO NOT angle the logo
- DO NOT stretch the logo's proportions
- DO NOT change the proportion of elements within the logo
- DO NOT move elements within the logo
- DO NOT alter the colour of the logo
- DO NOT allow the logo to fade
- DO NOT change the logo's typeface
- DO NOT reproduce the logo in low resolution
- DO NOT placing the logo over a dark background – if necessary, use a white coloured logo.

SecretCare.in

MONO VERSION OF THE LOGO

Wherever possible, the full colour version of the logo should be used. However, there may be occasions when it is necessary to reproduce the logo in black and white (e.g. press ads, faxes). Here are the black tint values for the mono version of the logo. There is also reverse version (white), so if it's necessary to place the logo on a dark background use a white colour logo..
